

## Quality Policy Statement

B A Systems fully understands the importance of providing customers with products that meet or exceed the agreed requirements.

We recognise that this goal will only be achieved by our commitment to effective and efficient Quality Management and Outstanding Business Practice at all levels and within every function within our organisation.

To support these aims, the company:

- Is committed to maintaining, reviewing and continuously improving business systems, practices, policies, to build a strong culture of quality, safety and sustainability which feeds directly through to providing more value to our clients and other stakeholders.
- Invests in outside consultancy to improve our operation in areas which have an immediate and direct positive impact for our clients.
- Training of management and staff with the objectives of achieving ongoing improvements in systems and infrastructure on a continuing basis.
- Studies the changing needs of the construction industry, our clients, main contractors, project managers, site managers, quantity surveyors, architects, to identify the needs in these areas and provide solutions.
- Is committed to reviewing and adhering to all current legal requirements including the requirements of the ISO9001-2015 quality standards.
- Undertakes risk reviews to ensure it maintains and improves quality by setting clear and achievable objectives.

This quality policy will be reviewed on each management review.
